

Push-Down Spring-Up Locking Acoustic Guitar Stand

GS7141 / 13520

ON-STAGE ORIGINAL

Features and Benefits

Push to stay. Spring to play. A small stand with big time security. The GS7141 features a unique spring mechanism that locks your guitar in place, effectively making the stand and instrument one unit. The stand and guitar can be moved around stage or studio together with one hand. Operation couldn't be easier; simply press your guitar into the spring-loaded lower yoke and lock it into place under the upper yoke. Designed for the working musician, the GS7141 accommodates most full size acoustic guitars. Patent-pending design.
