

Large Drum Mat

DMA7550 / 14746

Features & Benefits

The DMA7550 7' x 5' Nonslip Drum Mat is a portable solution for keeping a drum kit firmly in place during playing. The flexible, textured material absorbs shock and provides friction to prevent the bass drum, pedals, and other drums and hardware from sliding or shifting. Set up is quick and easy and its footprint provides ample space for a large drum kit or percussion setup. For ease of transportation and storage, the mat rolls up and includes two straps and a carry bag.

Specifications
